

IV Venofer® (Iron) Prep

- 1. Hold oral Iron (FE) medication the day before and the day after the iron infusion.**
- 2. You will not be given the IV iron if you have an active infection or are taking antibiotics.**
- 3. You should wear suitable clothing for an IV. If you wear clothing with long sleeves, you should be able to move them up above the elbow.**
- 4. You should wait at least 48 hours after the Iron infusion before you have labs drawn.**

The Iron infusion usually takes approximately 1-1/2 hours.

If you are not able to keep your scheduled appointment or if you have any questions concerning the IV Iron, please contact the CAPD department at (574) 273-6777 to reschedule.
